

Technical Skills

HTML, CSS, JavaScript, Amazon Alexa, React, Redux, Sass, Jest, jQuery, Git, GitHub, BitBucket, Developer Tools

Employment

Accenture

Web Developer - Apr. 2019 to Current - Chicago, IL

- Helped a client build an Amazon Alexa application for the Echo Show, creating both a GUI and VUI, using JavaScript, Jest, and the Alexa Presentation Language via JSON
- Worked with large retailers to improve their websites' performance using a variety of technologies for each including HTML, CSS, Sass, JavaScript, jQuery, and extensive use of developer tools
- Came up with the idea for and developed an internal application with a designer that checks what desks are available in the office and takes reservations using HTML, CSS, JavaScript, React, and Redux

Kellogg School of Management

Course Logistics Specialist (Contract) - Dec. 2017 to June 2018 - Evanston, Illinois

- Built a Chrome extension for Canvas, a learning management system, to save time on various projects such as creating and sorting student groups, using HTML, CSS, and JavaScript
- Developed web applications for creating seating charts and student information cards to improve efficiency on those tasks across several departments, using HTML, CSS, and JavaScript

Harris School Solutions

Web Software Developer Apprentice - Apr. 2017 to June 2017 - Remote

- Added validation and transformation functionality for inputted user files, returning descriptive error messages to clients when applicable, using JavaScript
- Contributed to unit testing using Mocha and Chai
